

PLEASE NOTE THE MEETING DATE IS CHANGED!

We will not be meeting on Wednesday April 25th. We have been forced to reschedule the meeting to May 16th!

It's spring time- Training will be on A/C

Steve Jones from Drive Train Industries will walk us through some basics and will cover some technology that other Fire Shops are currently using! Steve will also have a discussion with us in regard to the new product 1234yf that we will be seeing.

Steve has asked that we are armed with a list of discussion items that he and Drive Train can help us with.

If there are some AC related parts that you find hard to obtain let him know during this class and he will go to his office and make arrangements to help you!
